BBright

What It Is:
Asymmetric 79mm bottom bracket shell

How It Works:
Allows for oversize down tube and left chain stay

Performance Benefit:
Increased system stiffness with less material weight

Notes:
Designed by Cervélo engineers, available as an open standard

Carbon Dropouts

What It Is:
Dropouts are made of carbon fiber instead of aluminium

How It Works:
Tough, compression-molded carbon dropouts replace traditional metal dropouts in the frame and fork

Performance Benefit:
Less weight

Reduced-Friction BB Guide

What It Is:
At the bottom bracket, each derailleur cable smoothly curves in a single plane, no side bends or kinks

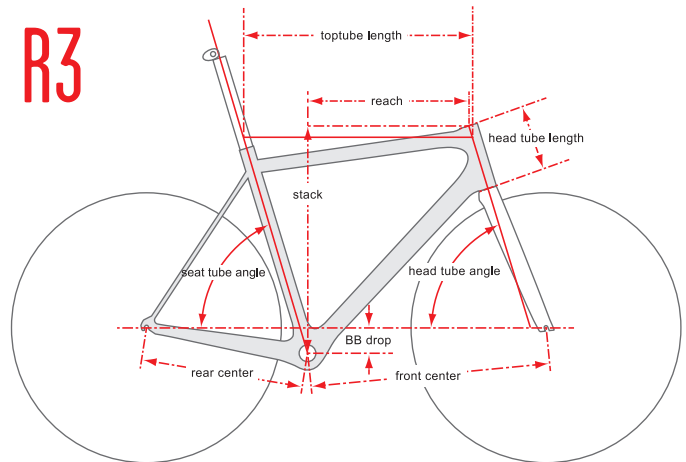

How It Works:
Significantly reduces cable friction

Performance Benefit:
Lighter, crisper, more accurate shifting

Notes:
Check the undersides of our competitors' bikes to see the difference
